

## Tractor Operation

- ✓ **Read and follow tractor manufacturer's instructions for operation.**
- ✓ **Only operate a tractor if authorized and properly trained.**
- ✓ **Always supervise inexperienced operators.**
- ✓ **Keep tractors in good repair. Ensure steps and pedals are kept clean and non-slip.**
- ✓ **Confirm all moving machine parts are guarded. Replace or repair as needed.**
- ✓ **Keep a first-aid kit in every tractor.**
- ✓ **Do not remove or modify safety features.**
- ✓ **Only start the tractor when sitting in the driver's seat. Ensure no one is standing near the tractor when starting. Turn off the engine and set brakes prior to exiting.**
- ✓ **Never leave running tractors unattended.**
- ✓ **Always lower front-end attachments and three-point linkages before shutting down a tractor.**
- ✓ **Tractors have a high center of gravity and roll over easily. Use caution when driving over hilly ground.**
- ✓ **Do not permit riders on the tractor or tractor implements.**
- ✓ **Warn others of potential hazards and insist they use adequate precaution.**
